

### Clackamas County Bank Street Tree Installation Summary

- The eight stormwater trees being installed along Burnside at Clackamas County Bank should be finalized by the end of 2019.
- Currently, the structural soil has been installed under the sidewalk, and the concrete curbs around the tree wells have been poured.
- Other development projects have expressed an interest in similar treatments, so staff have developed a standard detail that can be shared with design engineers. Will be included with updated Public Works Standards due out on January 1, 2020.
