

NW Division Complete St – Phase 1: Wallula Ave – Birdsdale Ave

Vicinity Map

Project Description

Gresham’s Transportation Division would like to introduce this project to the Urban Forestry Committee and conduct a discussion about its completion.

This project is federally funded and will construct sidewalks and bicycle lanes where they are lacking on both the north and south side of NW Division St Between Birdsdale and Wallula. This project will improve pedestrian, bicyclist, transit user and driver safety, connectivity, and usability throughout the corridor. The project has grade challenges that we would like to explain and will require the installation of several retaining walls, the regrading of driveways and the removal of some trees.
