

General information

Signs provide display for certain sites and activities and are visible from off the property. A sign permit is required for any sign that will be on the property for more than 90 days.

There are different types of signs, but the most common are the following:

- A *freestanding sign* is on a frame, pole, or other support structure and not attached to any building.
- A *wall sign* is attached to a building's exterior wall.

Code

Standards for Signs are found in **Appendix 6.000** of the Gresham Community Development Code (GCDC).

Timeline

Application materials

- Non-refundable fee. *Contact the Permit Center for amount.*
- A completed sign permit **application**.
- Two copies of **sign drawings** showing:
 - Sign dimensions
 - Materials
 - Attachment details
 - Footing and calculations (if freestanding)
 - Electrical permit # (if illuminated)
- Two copies of a **site plan** showing location of:
 - Signs (existing)
 - Signs (new) labeled with sign #
 - Property lines
 - Access points
- Two copies of **engineering drawings** for any freestanding signs over 6 feet.
- Authorization signature from the **property owner**.

Tips

*How to measure sign dimensions**

- For signs in frames/cabinets, the area is based on the outer dimensions of the frame or cabinet around the sign.
- For signs without a frame, the area of the base material will be measured.
- When a sign has individual pieces attached to a wall, it is determined by an area drawn around all the pieces.

How to measure wall dimensions

- For buildings with multiple businesses, provide the measurements for the leased space.

**See Section A6.020 for additional information.*
