

Instructions:

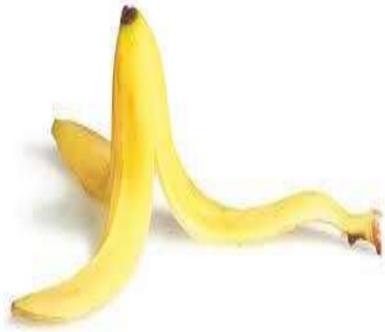

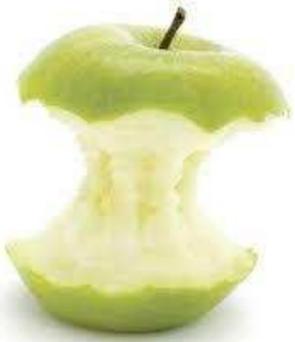

This matching game will help students learn which bins their lunch wastes should go in so they are properly recycled, composted or sent to the landfill. You can use these cards as flash cards to quiz the class, or play it as a game.

To play as a game, use the Plate to Power recycling station that is laid out on the other side of this sheet. Have your students arrange all items beneath the bins they think the items should go in.

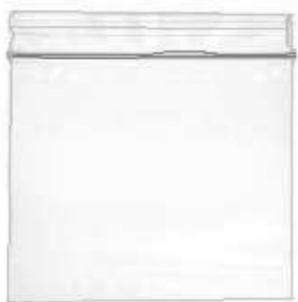

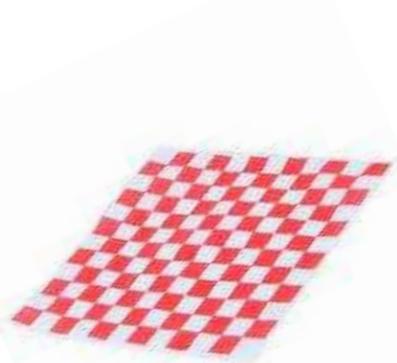

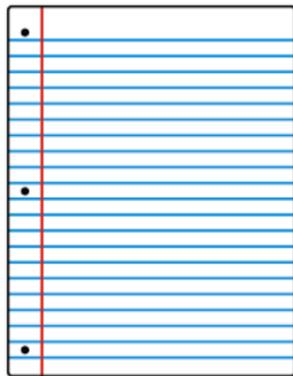

After the students place the cards, flip them over to see how many they got right!
Review any mistakes.
